

Front End Training Program

Prime provides an intuitive data and analytics platform that empowers its clients to work smarter. It helps them gain relevant insights from data and uncover hidden value potential in a world that is increasingly data-abundant.

Prime is starting the first FREE training program for Front End Developers. Agon Lohaj will be your trainer and Leutrim Neziri, your assistant. Split up into 2 hours per day, 2 times a week for a total of **26 hours** (7 weeks) starting from the **beginning of April**. We will offer a **PAID** internship for 1-2 participants that will be selected to continue the journey towards becoming a senior!

A person who completes the training successfully will be able to understand the following concepts:

1. Working with git, git tools, using GitLab as a repository with Source Tree
2. Working with CD/CI
3. Working with Webpack
4. Working with React JS and Redux
5. Setting up an API server
6. Basic API implementation using MongoDB as a data storage tool
7. Basic Mongo querying
8. Agile Methodology

Requirements:

1. Bachelor's degree in computer science or related studies (BONUS)
2. Basic coding skills
3. A laptop
4. English (BONUS)
5. Motivation and Dedication

Fun activities included:

1. Hangout and Drinks
2. Fun and entertainment (ping pong, xbox, guitar hero)
3. Meetups

Furthermore, we will assist participants with appropriate recommendations at other companies operating in Kosovo based on achievements and developed skills during their training cycle.

Please send your CV's to agonlohaj@goprime.io, CC endritbytyqi@goprime.io with the subject "**Front End Training Program**" no later than **29th of March**.
